Question 1

Correct

Mark 1.00 out of 1.00

Find Duplicate in Array.

Given a read only array of n integers between 1 and n, find one number that repeats.

Input Format:

First Line - Number of elements

n Lines - n Elements

Output Format:

Element x - That is repeated

For example:

Input	Result
5 1 1 2 3 4	1

Answer: (penalty regime: 0 %)

```

1  #include <stdio.h>
2
3  int find_duplicate(int arr[], int n) {
4      int i, j;
5
6      for (i = 0; i < n; i++) {
7          for (j = i + 1; j < n; j++) {
8              if (arr[i] == arr[j]) {
9                  return arr[i];
10             }
11         }
12     }
13
14     return -1; // No duplicate found
15 }
16
