## Question 1

Correct

Mark 1.00 out of 1.00

**Problem Statement:**

Given a sorted array of integers say arr[] and a number x. Write a recursive program using divide and conquer strategy to check if there exist two elements in the array whose sum = x. If there exist such two elements then return the numbers, otherwise print as "No".

Note: Write a Divide and Conquer Solution

**Input Format**

First Line Contains Integer n – Size of array

Next n lines Contains n numbers – Elements of an array

Last Line Contains Integer x – Sum Value

**Output Format**

First Line Contains Integer – Element1

Second Line Contains Integer – Element2 (Element 1 and Elements 2 together sums to value "x")

**Answer:** (penalty regime: 0 %)

```

1  #include <stdio.h>
2  int binarySearch(int arr[], int low, int high, int target) {
3      if (high >= low) {
4          int mid = low + (high - low) / 2;
5
6          if (arr[mid] == target)
7              return mid;
8          if (arr[mid] > target)
9              return binarySearch(arr, low, mid - 1, target);
10         return binarySearch(arr, mid + 1, high, target);
11     }
12     return -1;
13 }
14 void findTwoElements(int arr[], int n, int x) {
15     for (int i = 0; i < n - 1; i++) {
16         int complement = x - arr[i];
17         int idx = binarySearch(arr, i + 1, n - 1, complement);
18         if (idx != -1) {
19             printf("%d\n%d\n", arr[i], arr[idx]);
20             return;
21         }
22     }
23     printf("No\n");
24 }
25 int main() {
26     int n, x;
27     scanf("%d", &n);
28     int arr[n];
29
30     for (int i = 0; i < n; i++) {
31         scanf("%d", &arr[i]);
32     }
33
34     scanf("%d", &x);
35
36     findTwoElements(arr, n, x);
37
38     return 0;
39 }

```

|   | Input                              | Expected | Got     |   |
|---|------------------------------------|----------|---------|---|
| ✓ | 4<br>2<br>4<br>8<br>10<br>14       | 4<br>10  | 4<br>10 | ✓ |
| ✓ | 5<br>2<br>4<br>6<br>8<br>10<br>100 | No       | No      | ✓ |

Passed all tests! ✓

Correct

Marks for this submission: 1.00/1.00.
